

## Enjoy 3D entertainment while on the go

- Experience a 3D Full HD SuperBright display
- Work faster with the Intel® Core™ processor
- Complete the experience with 3D audio
- Enhance connectivity with Bluetooth 3.0
- Transfer files swiftly with Samsung's USB 3.0

3D technology is revolutionizing our daily lives – bringing the latest blockbuster movies bursting into life and creating even more thrills with the ultra realistic gaming. With the Samsung RF712 notebook you can take your 3D entertainment wherever you go. See brilliant detail with a 17.3" Full HD display that is 20% brighter than normal 3D screens. The active 3D glasses ensure more natural colours and seamless playback, and are also lighter and more comfortable to wear. And with the 3D Enhanced Acoustic Chamber System, this notebook is ready to revolutionise your whole world of movies, games and entertainment.

### 3D 17.3 FHD display with SuperBright Plus

With 400nit brightness the Full HD SuperBright Plus display provides ultra clear and vivid 3D images and is 100% brighter than normal 3D screens. It also produces more natural colours with much less visual disruption when viewed through active shuttering glasses. Using proven Bluetooth technology, up to four people\*\* can watch at the same time, so you and your family and friends can enjoy optimised 3D entertainment from any angle and nywhere. Furthermore, the glasses are lighter and more comfortable to wear than normal 3D glasses – in fact, you may forget you have them on!

### Take multi-tasking with faster and smarter Intel® Core™ i7 / i5 / i3 Processor\*

With intelligent processing for processor-demanding tasks, the new Intel® Core™ i7 / i5 / i3 Processor (up to Quad Core) delivers unrivalled speed and efficiency. Supported by Intel® Intelligent Power Technology and Turbo Boost Technology, it optimises power usage by automatically allocating it where it is needed, thus, perfectly suited for heavy multitasking. So whether you're creating HD videos, composing digital music, editing photos, or playing the latest 3D PC games, the RF712 notebook delivers every time.

\* Factory Option

### Better graphics for 3D entertainment

AMD Radeon™ HD6650M graphics deliver an outstanding stereoscopic performance for incredibly rich and dynamic 3D entertainments. Enhanced multimedia acceleration ensures clear and fluid playback of ven the most visually intensive 3D movies, images and games, while an integrated HD audio controller generates true-to-life Stereo 3D sound.

Immerse yourself in realistic 3D audio with SRS Premium Sound.

Samsung has combined its latest acoustic technology with SRS Premium Surround Sound to deliver the richest and clearest audio experience. The Enhanced Acoustic Chamber System strengthens low-pitch sounds, provides more area to enjoy your music, movies and games. The RF712 provides enhanced bass, crystal clear dialogue and better definition control for maximum clarity at higher frequencies.

Premium connectivity with Bluetooth 3.0 High Speed.

Enjoy wireless transfer of media and other data between your electronic devices—audio, video, print data and more, with an upgraded Bluetooth 3.0 High Speed delivering higher data transmission speeds (24 Mbps), 8x faster than Bluetooth 2.1 (3 Mbps) and enhanced power control for extended battery life.

### Sleep-and-Charge USB

Pack one less cord on your next trip. The Samsung RF712 lets you charge many of your portable devices, such as your Smart Phone or MP3 player, right through its USB charging port. And your notebook doesn't even have to be turned on.

### AllShare™

Samsung AllShare™ with DLNA technology lets you share and play multimedia content from your AllShare™ device directly with another AllShare™ supported device like TVs, PCs, notebook PCs, even mobile phones.

### Fast start

In an advanced sleep mode, your notebook saves and stores data onto the HDD as well as memory. When you flip your notebook screen upright, Fast Start brings your computer back to the way you left it—within seconds.

### Samsung Recovery Solution

In situations requiring important system information to be restored, the Samsung Recovery Solution automatically creates system restore points on your HDD, and allows your computer to reinstall important system information to these restore points, while improving the overall stability of your notebook.

Expandable storage over 1.5 terabyte\*

Thanks to RF712's huge expandable storage space, all of your favourite movies, music and pictures can happily co-exist together in one spot. With over 1.5 terabyte of storage, say goodbye to lugging around an external HDD and you can also save loads of time and hassle - no longer having to delete or transfer files to make way for your latest uploads. The RF712 is all about increasing mobile performance and making sure that you can keep all your multimedia close at hand wherever you go.

\* Factory Option

Faster file transfers with USB 3.0.

Samsung knows that the importance of easy and fast file transfers is paramount for PC users. For this reason, the latest USB 3.0 port has been designed to deliver the speed, so uploading HD movies will takes just seconds —while keeping its compatibility with USB 2.0 / 1.1 devices. It almost sounds too good to be true.
